

# Sri Sairam College of Engineering: Curating a Different Breed of Engineers

By John Angami

Searching for a progression, a student is likely to appreciate how hard it is to choose a place for their future engineering experience. Choosing the right college will have a large positive impact on their future, students should be willing to spend quality time to do proper research on the college which meets the best of their abilities. India is now on an entrepreneurial Super highway, and there are an increasing number of students showing signs of interest and enthusiasm in entrepreneurship. This process of learning has always been considered to be changing with time for better results. With this change, colleges also upgrade themselves to teach students in a more advanced and efficient way. One such college meeting head to head with all the requirements; a student might need is, Sri Sairam College of Engineering, formerly known to many as Shirdi Sai Engineering College. The institution today, is one among the leading colleges who create future engineers, giving them the right guidance, making them industry ready and helping them become excellent entrepreneurs.

Established in the year 1997 by M.J.F. Leo Mutha, a philanthropist, the college offers top quality technical education in the field of engineering. It moulds the younger

M.J.F. Leo Mutha, Chairman

generation of engineers with the spirit of service to society. With a very dedicated faculty, the institute provides adequate infrastructural facilities too. The college sets explicit objectives and deliberate activity to accomplish excellence in every bough of technological education. "We teach in such a way that the students decide on whether to get placed or go abroad for their higher education or be entrepreneurs by the time they finish their second year", says Dr.V.Vijayakumar , Principal, Sri Sairam College of Engineering.

Hard work, open communication, a healthy mentality and an excellent sense of responsibility are some of the aspects the college carefully works on. Every department has an innovation

club which gives every student a chance at innovating something and showing its worth. Students are prepared to adopt the contemporary challenges of their day to day lives. This also enables them to realize their errands towards the society and the nation as well. The faculty also dedicatedly combines with the students in all aspects to make them grow and work more efficiently on their innovations. The dedicated, determined and industrious faculties of the college may take the lion's share of the a claimants in producing job ready engineers. The institution strongly emphasizes an academic brilliance and industry processes and in no way reconciles on a lower teaching standard at any cost. "A good engineering college is the one that

Sai Prakash Leo Mutha, CEO

enables the students to think outside the box and encourage innovation to happen inside of the box," says Sai Prakash Leo Mutha, CEO & Managing Trustee.

The college has also bagged all the three places in the podium to bring home the gold, silver and bronze medals in the recently concluded Global Entrepreneurship Summit 2014. This summit gave a platform to a total of 80 project proposals and 80 business plans from various colleges

and start-ups, where the top three was bagged by the students of Sri Sairam College of Engineering. The college is also on course to change the whole overview of grocery shopping, their faculty has now come up with a proposal where in, the device they are developing, will read all the items at once and bill them automatically. Standing in a long line to pay the bill, will be ancient once this technology hits the market.

And through its placement program, the institute shows the very best of its students to the industrial world. These young minds are prepared in the Placement & Training Cell, which functions with the primary aim of placing students in

The institute provides a complete infrastructure for effective functioning of these cells.

The Placement and Training cell is the interface between the students and industries and is dedicated to help the students towards their campus placement and industrial training. The various activities, which the college regularly undertakes are - placement of the students, Entrepreneurship awareness & development programs, Wipro, IBM, Subex, HP, Saplabs, Hikaart, Scimsys, Anantony, HCL, Haval Technology, Aditi Technologies, 24/7 Customer, Marhatee Associates, Tech Mahindra, Cap Gemini, L & T Infotech, Engbaris, DelSol And Global Automation India Pvt. Ltd are some of

Winners of the global entrepreneurship summit

top notch companies even before they complete their respective courses. The Placement & Training cell goes all out to train the students to meet the high industry expectations. This training gives students an exposure to good work culture, they would need at the beginning of their professional lives. The students are trained in this institute to be well prepared to handle responsibilities and work with the most cutting-edge technology in the industry today. Driving students to test their limits with these cells, they are given a jump start in their career.

the major recruiters of this college. The college focuses on guiding the students to become Entrepreneurs and to create a Culture suitable for employees. Instead of "Job Seekers" - Students are trained to become "Job Providers" through Technology interventions. The EDP cell coordinates various activities directed towards enterprise creation and entrepreneurship development. This encourages students to "Be their own Bosses" and helps them to be more creative, to come up with innovative ideas.

The college along with 20000
